To: Whom it may concern
From: Craig Maxa

There is an understanding that certain regulations by the government are essential to protect all of us as citizens. I understand that restrictions, if harmful to citizens, are necessary however I do not believe that this is one of those cases. I also think that as a citizen we should have the right to choose what we listen to and I choose XM radio and all of its programming. I travel quite often and XM radio has added to my quality of life. I no longer have to switch radio stations and listen to static. It is one of the nice things in life that i have really enjoyed. Please do not limit the growth of a company let XM and Sirius grow.
